

## THREESIXTY LOGICA TESTING SERVICES

# WEBSITE TESTING

## CLIENT

Our client is a leading insurance provider in UK that provides its solutions to UK health care industries for case management and absence management or other health related activities.

### APPLICATIONS & REQUIREMENTS

- Maintenance and Regression testing on applications
- Test Case writing for applications
- End to end Regression Testing on web console.
- Regression testing of HTML app and native app for both the versions, Android and IOS.
- Integration layer testing.
- Web services testing (Soap UI/ REST APIs) and Load testing as well.

### TOOLS AND TECHNOLOGIES

- JIRA(Agile)
- Socco
- SoapUI

### PROBLEMS STATED/ CHALLENGES FACED

- Difficulty in understanding too many business flows of similar applications of different clients
- Often it was difficult to reproduce issues on a single device. We had to check it across multiple devices to reproduce it at our end.

### PROCEEDING & SOLUTIONS

- Used test Case Management to set up the test suite in order to understand and test business flow of the application.
- Used multiple devices, scenarios, different types of versions to understand the behaviour of the application. Also kept a track of each flow using use cases.

### ADVANTAGES OF THE TOOLS USED

- SoapUI helps in functional testing and understanding of APIs
- JIRA describes the actual task and makes transparency among all the member of the team especially between developers and offshore team.

### BENEFITS TO THE CLIENT

- Successfully performed Regression Testing
- Product delivered was of extreme quality and designed as per the requirement.
- Strengthened trust and relationship between the client and us.
